# Cha Sysctlhardener: how it is put together

sketched from the files

# Cha Sysctlhardener: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

# Product map: what cha sysctlhardener is for

## WHAT IT IS

A small project in Python, Markdown, Text. The README and the files are the whole claim.

## WHAT GOES IN

The files at the top of the tree: main.py, README.md, requirements.txt.

## WHAT COMES OUT

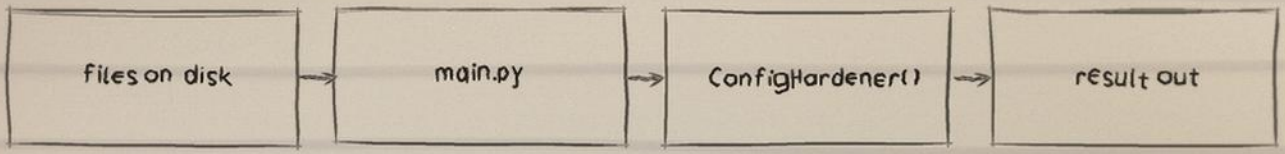

What the top files produce when they run or get read. Nothing else is promised.

## WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, 

# Cha Sysctlhardener: data flow, in one direction

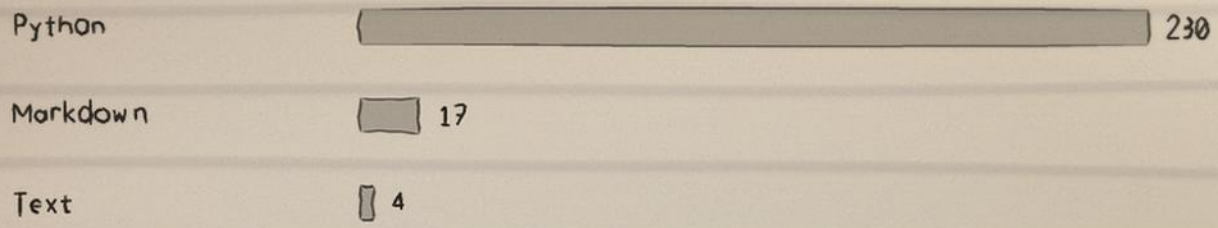

One direction. Anything the code does not do is not drawn.

second sheet, GK

# Cha Sysctlhardener in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.
4 commits, first 2025-05-02, last 2025-05-02, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

# Cha Sysctlhardener: schematic of the apparatus

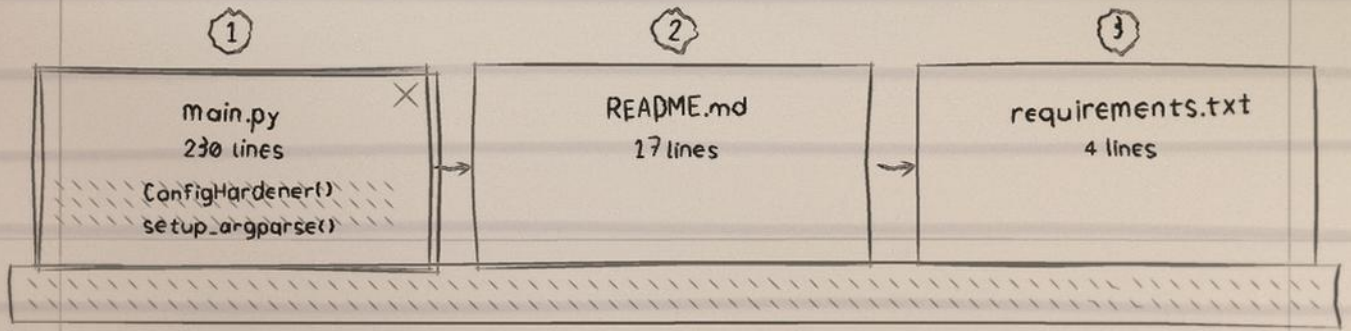

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. requirements.txt

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 251 lines counted

turns of the crank so far: 4 commits, 2025-05-02 to 2025-05-02

measured and sketched, CK
